

ACOUSTIC BUOY

Introduction

The buoy will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir.

The buoy will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir.

THE PROJECT

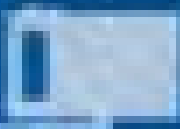

The purpose of the acoustic buoy is to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir.

There is a lot of work to be done. We need to build the buoy. We need to build the buoy. We need to build the buoy. We need to build the buoy. We need to build the buoy.

The buoy will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir.

The buoy will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir. It will be used to monitor the water level in the reservoir.
