340056 - ETER-M6O29 - Thermal Engineering

Coordinating unit: 340 - EPSEVG - Vilanova i la Geltrú School of Engineering
Teaching unit: 729 - MF - Department of Fluid Mechanics
Academic year: 2017
Degree: BACHELOR'S DEGREE IN MECHANICAL ENGINEERING (Syllabus 2009). (Teaching unit Compulsory)
BACHELOR'S DEGREE IN INDUSTRIAL ELECTRONICS AND AUTOMATIC CONTROL ENGINEERING
(Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN INDUSTRIAL DESIGN AND PRODUCT DEVELOPMENT ENGINEERING
(Syllabus 2009). (Teaching unit Optional)
BACHELOR'S DEGREE IN ELECTRICAL ENGINEERING (Syllabus 2009). (Teaching unit Optional)
ECTS credits: 6
Teaching languages: Catalan

Teaching staff
Coordinator: JAUME MIQUEL MASALLES
Others: JAUME MIQUEL MASALLES
CARLOS PRUDENCIO DE GRACIA
DAVID PUJOL BRESCÓ

Prior skills
Differential and integral calculus.
Differential equations.
Knowledge of: Fundamentals of thermal engineering
Knowledge of: Fluid mechanics.

Requirements
340025 - Differential Equations
340026 - Advanced Calculus
340038 - Fundamentals of Thermal Engineering (in case you have not studied: 340032 - Thermal Engineering and Fluid Mechanics)
340039 - Fluid Mechanics (in case you have not studied: 340032 - Thermal Engineering and Fluid Mechanics)

Degree competences to which the subject contributes

Specific:

Transversal:
2. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.
3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 3. Communicating clearly and efficiently in oral and written presentations. Adapting to audiences and communication aims by using suitable strategies and means.
4. THIRD LANGUAGE. Learning a third language, preferably English, to a degree of oral and written fluency that fits in with the future needs of the graduates of each course.
5. TEAMWORK - Level 3. Managing and making work groups effective. Resolving possible conflicts, valuing working with others, assessing the effectiveness of a team and presenting the final results.
6. EFFECTIVE USE OF INFORMATION RESOURCES - Level 3. Planning and using the information necessary for an academic assignment (a final thesis, for example) based on a critical appraisal of the information resources used.
340056 - ETER-M6O29 - Thermal Engineering

Teaching methodology

- Lectures and participatory classes, consisting of explanation and development of the theory and, if necessary in the resolution of problems. The material user will be available to the student in the Digital Campus section of the subject.

Learning objectives of the subject

At the end of the course students should be able to:

Study load

<table>
<thead>
<tr>
<th>Total learning time: 150h</th>
<th>Hours large group:</th>
<th>52h 30m</th>
<th>35.00%</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Hours medium group:</td>

<tr>
<th>(ENG) TEMA 3. TRANSMISIÓN DE CALOR POR CONVECCIÓN: CORREOLACIONES EMPÍRICAS</th>
<th>Learning time: 24h 15m</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Description:</strong> 3.1 Relevant dimensionless parameters for characterizing forced convection.</td>
<td>Theory classes: 8h</td>
</tr>
<tr>
<td><strong>Related activities:</strong> A6. Problems of convective heat transfer: Empirical correlations.</td>
<td>Laboratory classes: 2h 15m</td>
</tr>
<tr>
<td><strong>Specific objectives:</strong> At the end of this teaching unit, the student must be able to:</td>
<td>Self study: 14h</td>
</tr>
</tbody>
</table>
The evaluation weight of the various concepts involved in the qualification of the subject are:

- INDIVIDUAL WRITTEN TESTS (68 %)
- DELIVERY OF EXERCISES RESOLVED (10 %)
- REPORTS OF LABORATORY PRACTICE (10 %)
- PREPARATION, DELIVERY IN WRITING AND ORAL PRESENTATION OF AN ITEM (12 %)
Regulations for carrying out activities

- Each of the two individual written exams (Partial Controls) consist of two parts: a test of theory (which may constitute up to 30% of the grade of the exam) and a number of problems (up to 100% of the note of the exam). Both exams have the same evaluative weight (34%) being the sum of both the 68% of the final grade.
