Degree competences to which the subject contributes

Specific:
1. CE26. Applied knowledge of systems and fabrication process, METROLOGIA and quality control.

Transversal:
2. SELF-DIRECTED LEARNING - Level 3. Applying the knowledge gained in completing a task according to its relevance and importance. Deciding how to carry out a task, the amount of time to be devoted to it and the most suitable information sources.
3. EFFICIENT ORAL AND WRITTEN COMMUNICATION - Level 3. Communicating clearly and efficiently in oral and written presentations. Adapting to audiences and communication aims by using suitable strategies and means.
4. TEAMWORK - Level 3. Managing and making work groups effective. Resolving possible conflicts, valuing working with others, assessing the effectiveness of a team and presenting the final results.

Teaching methodology

The sessions are divided into classes of theory, problems and laboratory practice.
The lectures comprise the statements of the basic theoretical concepts of the topics of the course applied examples and exercises as described.
They will also be proposed Exercises that the students will solve individually "on line" through a mobile phone, a tablet or a laptop.
In laboratory practice classes, experimental fellows are developed and is the student, individually or in groups, who must work on the aspects set by the teacher.

Learning objectives of the subject

When finishing the subject the student has to be able to:

- Describe the main processes of formation used at industrial level.
- Use quality management tools and metrology applied to manufacturing processes.
- Choose the type of manufacturing process of a piece based on the design, material and technological and environmental aspects.
- Use, in a basic way, the machines of the manufacturing processes studied.
- Work in teams effectively, improving communication, distribution of tasks and group cohesion.
- Exhibits effective technical results.

# 340059 - PRFA-M4O12 - Manufacturing Processes

## Content

### - Metrology and quality in manufacturing processes.

<table>
<thead>
<tr>
<th>Learning time: 37h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Theory classes: 12h</td>
</tr>
<tr>
<td>Practical classes: 0h</td>
</tr>
<tr>
<td>Laboratory classes: 4h</td>
</tr>
<tr>
<td>Self study: 21h</td>
</tr>
</tbody>
</table>

**Description:**
Measurement. Errors and uncertainty in the measurement
Dimensional and geometric tolerances. Settings.
Verifiers fixed dimensions. Gauges
Surface Finish

**Related activities:**
A1 = Learning Assessment.
A2 = Lab.
A3 = Reporting.

**Specific objectives:**
Calculate adjustments make mounting and control.
Decide surface roughness depending on the application.
Having quality concepts in all phases of the production process; estimate its difficulty and need, and know the different solutions adopted in the industry and the tools available.

### - Conforming processes by plastic deformation and machining.

<table>
<thead>
<tr>
<th>Learning time: 35h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Theory classes: 10h 30m</td>
</tr>
<tr>
<td>Practical classes: 0h</td>
</tr>
<tr>
<td>Laboratory classes: 3h 30m</td>
</tr>
<tr>
<td>Self study: 21h</td>
</tr>
</tbody>
</table>

**Description:**
Hot deformation process
Cold deformation processes i cut
Machining by chip removal. Features

**Related activities:**
A1 = Learning Assessment.
A2 = Lab.
A3 = Reporting.

**Specific objectives:**
Know the different types of deformation processes in hot, cold deformation i cut, its features and where they apply.
Understand the concept of machining machining, advantages, machinery, and basic concepts of calculus.
- Conforming processes by casting and molding.

**Description:**
Foundry. Sand casting
Materials for molds
Molding metal mold

**Related activities:**
A1 = Learning Assessment.
A2 = Lab.
A3 = Reporting

**Specific objectives:**
Know the most important molding processes and parameters that define them

**Learning time:** 18h 30m
Theory classes: 6h
Practical classes: 0h
Laboratory classes: 2h
Self study: 10h 30m

---

- Powder Metallurgy.

**Description:**
Powder Metallurgy
Arc welding, TIG, MIG, resistance
Hard and soft soldering

**Related activities:**
A1 = Learning Assessment.
A2 = Lab.
A3 = Reporting

**Specific objectives:**
Know the main features and applications of Powder Metallurgy.
Knowing the different welding technologies.

**Learning time:** 18h 30m
Theory classes: 6h
Practical classes: 0h
Laboratory classes: 2h
Self study: 10h 30m
# 340059 - PRFA-M4O12 - Manufacturing Processes

## Computer aided manufacturing.

**Learning time:** 35h  
- Theory classes: 10h 30m  
- Practical classes: 0h  
- Laboratory classes: 3h 30m  
- Self study: 21h

**Description:**  
Main concepts of computer aided manufacturing. ISO programming.

**Related activities:**  
A1 = Learning Assessment.  
A2 = Lab.  
A3 = Reporting.

**Specific objectives:**  
The student must know the concept of numerical control, their vewntajas, machinery, and basic programming concepts.

## (ENG) Proves d’avaluació individual

**Description:**  
Each student will make two single assessment tests and rump work to be presented in public.

**Learning time:** 6h  
- Guided activities: 6h
### Planning of activities

</thead>
<tbody>
<tr>
<td><strong>Description:</strong></td>
<td>Theory classes: 1h</td>
</tr>
<tr>
<td>Exercises will be proposed that students will solve in class individually &quot;online&quot; through a mobile phone, a tablet or a laptop.</td>
<td></td>
</tr>
</tbody>
</table>

#### Qualification system

The training activities of learning and individual student study will be evaluated through written or oral tests: 75%. Training activities related to exercises resolved in class by students: 5%

The training activities related to practical work is assessed by the following parameters: personal attitude, individual work developed, reporting on individual or team activities: 20%

Only the written tests, corresponding to 75% of the final mark, will be Reassessable
Regulations for carrying out activities

The conditions for completion of each test shall be specified in each case, in good time.
